

Greg, Norm,

Thanks again for your assistance with repeater frequencies that covered the Rubicon trail. You may have saved a life. Below is a quote from our Jeep club forum:

"Thanks for posting the repeater info. It sure came in handy this weekend as I've used it to contact someone on the outside to get a message to the medivac folks so that they could come in and pull out someone who had fell out of the rig and got crushed under it during a rollover. Between us (SoCal) and Sierra chapter we've had coordinated with the Medivac base, the chopper as well as driven the medic up the trail to the guy and

then hand carried the guy down the hill on a stretcher."
